1	Kick In	Shure Beta 91A	✓	B1:+4@80 B2:-4@250 B3:-2@600 B4:+5@3000	§ Beta 52A/Beta 91A blend — BODY + TOP to the Beta 52A; low-mids backed off so they don't stack. Polarity: sum in mono, flip ■ on one mic if thinner. Bus: notch -2/-3 dB @300-500 if it builds.
2	Kick Out	Shure Beta 52A		B1:+5@80 B2:-3@250 B3:-1@600 B4:+3@3000	§ Beta 52A/Beta 91A blend on kick — MID/PRESENCE core mic. Treat the pair as ONE: pan together, same VCA, keep the blend constant. Treat the pair as one signal: pan together, group to a VCA, keep the blend constant. Polarity: sum in mono and flip the polarity on one mic if the sum is thinner than either alone. Watch 300-500Hz buildup on the bus — notch -2 to -3dB if it stacks.

13	Guitar 57	Shure SM57		B1:-5@200 B2:-6@450 B3:+5@800 B4:+5@2500	§ SM57/Beta 27 blend on guitar — MID/PRESENCE core mic. Treat the pair as ONE: pan together, same VCA, keep the blend constant. 57 = midrange grit + presence core; Beta 27 = clean low-end body and the airy top (5.5k/9k) the 57 lacks. Keep the 57 owning mids — don't double them.

Seventh Heaven Pro — Reverb

FSQ is outdoors — default is no reverb send; the open air gives nothing back and wash competes with building reflections. Use only when the show calls for it. When used: short, bright, Late higher.

Preset: Plates 1 / #06 Vocal Plate | Decay 1.5s • PreDelay 24ms • VLF near factory • E/L Max Early · Late Equal to -6dB • Late Rolloff 8-10kHz —

FSQ: vocal — short, forward. Decay near factory (no room to subtract).

Preset: Rooms 1 / #02 Studio B Close | Decay 0.75s • PreDelay 0ms • VLF near factory • E/L Max Early · Late Equal to -6dB • Late Rolloff 8-10kHz —

FSQ: drum bus / instruments — tight. Decay near factory (no room to subtract).
