

THE BRIT PACK

SHOW PACKET — DiGiCo Quantum 225 · Memorial Hall · 2026-05-28

20 input channels · 6 monitor sends · Cincinnati, OH

BAND CONTEXT

The Brit Pack — British-born session musicians performing a definitive survey of UK rock and pop, 60s through 90s: Beatles, Stones, Led Zeppelin, Queen, The Who, Kinks, Cream, David Bowie, Elton John, The Police, Oasis, Radiohead and more. Personnel: **Matt Nakoa** (lead vox / guitar / keys), **Mark Johnson** (guitar / vox), **Bryan Percivall** (bass / vox), **Will Haywood Smith** (drums / vox).

Sonic target: Warm, punchy, period-appropriate. Classic British rock tones — not modern hyper-compressed stadium sound. Think Bonham's room, Page's Les Paul through a Supro, Watts's loose snare, McCartney's Hofner. Let the dynamics breathe. The MD421s on guitar cabs will deliver exactly the midrange bite these tones need.

STAGE PATCH

Two stage boxes. Box A covers drums, backline, and guitar cabs. Box B covers keys riser and Matt's vocal position.

STAGE BOX A — Drums / Backline / Guitar Cabs

DROP	SOURCE	MIC / DI	→ CH	48V
1	Kick In	Beta 91A	Ch 1	48V
2	Kick Out	Beta 52	Ch 2	—
3	Snare	Beta 57A	Ch 3	—
4	Hi-Hat	e609	Ch 4	—
5	Rack Tom	e604	Ch 5	—
6	Floor Tom	e604	Ch 6	—
7	OH Left	SM57	Ch 7	—
8	OH Right	SM57	Ch 8	—
9	Bass DI	Radial ProDI	Ch 9	—
10	Bass Amp	MD421	Ch 10	—
11	Guitar Center	MD421	Ch 13	—
12	Guitar Ctr DI	Radial ProDI	Ch 14	—
13	Guitar HL	MD421	Ch 15	—

STAGE BOX B — Keys Riser / Vocal Position

DROP	SOURCE	MIC / DI	→ CH	48V
B1	Keys Left	Radial ProDI	Ch 11	—
B2	Keys Right	Radial ProDI	Ch 12	—
B3	Matt Vocal	sE V7	Ch 17	—
B4	Matt Vocal 2	sE V7	Ch 18	—

Handheld vocals (Bryan Ch 16, Mark Ch 19, Will Ch 20) not in a stage box — confirm wireless receivers or direct XLR at load-in.

MONITOR SENDS

SEND	POSITION / DESCRIPTION
1	Bass — Bryan Percivall, downstage bass position
2	Keys — Keys riser
3	Center — DUAL wedge, lead vocal / center stage (Matt / Bryan swap)
4	Guitar HR — House-right guitar position
5	Drums — Drum riser, kit wedge
6	IEM — IEM Output 1 ➡ confirm recipient at load-in

CONSOLE REFERENCE

Channel Labels

CH	SHORT LABEL	INSTRUMENT	MIC / DI	48V	HPF Hz	GROUP
1	KICK IN	Kick In	Beta 91A	48V	40	Drums
2	KICK OUT	Kick Out	Beta 52	—	40	Drums
3	SNARE	Snare	Beta 57A	—	100	Drums
4	HAT	Hi-Hat	e609	—	400	Drums
5	RACK	Rack Tom	e604	—	100	Drums
6	FLOOR	Floor Tom	e604	—	60	Drums
7	OH L	OH Left	SM57	—	180	Drums
8	OH R	OH Right	SM57	—	180	Drums
9	BASS DI	Bass DI	Radial ProDI	—	40	Bass
10	BASS AMP	Bass Amp	MD421	—	60	Bass
11	KEYS L	Keys Left	Radial ProDI	—	30	Keys

15	GTR HL	Guitar High Left (amp)	MD421	—	100	Guitar
16	BRYAN	Bryan (vox)	Beta 58A	—	120	Vocals
17	MATT	Matt (vox)	sE V7	—	120	Vocals
18	MATT 2	Matt 2 (vox)	sE V7	—	120	Vocals
19	MARK	Mark (vox)	Beta 58A	—	120	Vocals
20	WILL	Will (vox)	Beta 58A	—	130	Vocals

VCA Groups

VCA	NAME	CHANNELS
1	DRUMS	Ch 1, 2, 3, 4, 5, 6, 7, 8
2	BASS	Ch 9, 10
3	KEYS	Ch 11, 12
4	GUITARS	Ch 13, 14, 15
5	VOCALS	Ch 16, 17, 18, 19, 20
6	ALL	VCA 1–5 master

SHOW NOTES & WATCHPOINTS

⚠ PHANTOM POWER

Only Ch 1 (Beta 91A boundary mic) requires 48V phantom. No other channel on this show needs phantom. All DIs are passive Radial ProDIs. Handheld vocals (Beta 58A, sE V7) are dynamics — no phantom. Verify before enabling phantom on any channel other than Ch 1.

GUITAR LAYER — Ch 13 + Ch 14

Guitar Center has both a MD421 (Ch 13, amp) and a Radial ProDI (Ch 14) on the same guitarist position. The DI is a parallel clean signal — confirm intended use with BIS at load-in (tone blend vs. backup). Both channels have independent EQ starting points in the channel processing doc. Group to the same VCA (VCA 4) and check for 300–500 Hz buildup on the guitar bus after both are in the mix.

DUAL VOCAL — Ch 17 + Ch 18 (Matt)

Two sE V7 mics assigned to Matt. These likely cover two different physical positions (center stage + keys/piano position) rather than simultaneous use. Confirm routing intent at production meeting. Treat as two independent vocal channels — do not sum to mono without a polarity check first. Both have identical EQ starting points in the channel processing doc.

OVERHEADS — SM57 x2 (Ch 7 + Ch 8)

Band is traveling with SM57s on overheads. Unconventional but will work — the 57's presence peak delivers a forward, defined cymbal picture suited to classic rock. Top-end air is limited compared to SDCs; EQ starting points in the channel processing doc compensate with a +2 dB shelf at 10 kHz. Link Ch 7 and Ch 8 as a stereo pair on the Q225. Polarity check both OHs against close drum mics in mono before soundcheck.

IEM FEED — Monitor Send 6

IEM Output 1 (Monitor Send 6) — confirm recipient at load-in. Likely Matt or Bryan based on vocal intensity of front-of-stage position. Confirm IEM make/model and whether they are using their own pack or house pack.

MONITOR CENTER — Send 3 DUAL WEDGE

Send 3 is a dual-wedge position at center stage shared between Matt and Bryan (lead vocal position). This is the highest-use monitor position on the stage. Budget extra gain-before-feedback headroom on Ch 17 (Matt) and Ch 16 (Bryan) — both will be open simultaneously at this position during shared-mic moments.

SPLIT PATCH TOPOLOGY

Stage Box B drops B3 and B4 (Matt's sE V7 mics) originate from the keys riser position — separate from the main drum/backline Box A. Confirm split chain continuity and that Box B feeds correctly to Ch 17 and Ch 18 at patch. The "B" numbering in the drop column distinguishes these from Box A's numeric drops.
