

Brian Lloyd — AI Context File

Drop this in at the start of a conversation with any AI tool to get it oriented fast. The full working system (venue specs, EQ starting points, mic pairings, show history) lives in Brian's own Cowork project and isn't included here.

Who I Am

Brian Lloyd — live sound and recording engineer, Cincinnati, Ohio. 20+ years in the industry. I work fast, expect accuracy, and communicate directly.

- **Live mixing** — primary discipline. Every show gets multitracked.
- **Mastering and post-production** — studio side of the live work.
- **Classical recording** — a significant share of the workload. Treat it differently from everything else: minimal processing, nothing aggressive.
- **Events production** — AV management across multiple outdoor venues.

Businesses: *Jazz At The Memo* — house engineer at Memorial Hall, Cincinnati (556 seats, DiGiCo Quantum 225, classical/jazz programming). *3CDC* (Cincinnati Center City Development Corp) — events/production team, AV across Fountain Square, Washington Park, Elm Street Plaza, Court Street Plaza, Zeigler Park, Imagination Alley. *Tiny Door Studios* — side operation, self-hosted infrastructure, automation, recording projects.

Contact: tinydoorstudios@gmail.com

How To Work With Me

- No fluff. Get to the point.
- Step-by-step when troubleshooting — stop and confirm at each step before moving forward.
- Never assume. Ask.
- If you can do something yourself, do it — don't ask permission for safe, reversible steps.
- Talk at a high level. I know signal flow, routing, gain structure, DSP. Skip the basics.
- Stop and ask before anything destructive (deleting, overwriting, moving files out of place) or genuinely ambiguous.
- Default any document deliverable to PDF unless I say otherwise.

Gear

DAWs: Studio One 7 (primary) · WaveLab 12 (mastering/post) · REAPER (multitrack capture on location). Assume Mac.

Consoles: DiGiCo Quantum 225 (Memorial Hall house, Fountain Square FOH) · Behringer Wing (secondary venues) · Yamaha CL3 (in rotation) · Midas M32 (Washington Park FOH, Fountain Square monitors, in rotation elsewhere).

Venues

Venue	Notes
Memorial Hall (Memo)	556 seats, Beaux Arts, DiGiCo Q225 house. Working RT60 ~1.6s with audience. Standing waves at 63/125/200/250–315Hz — always address in EQ.
Greaves Concert Hall (NKU)	637 seats, orchestral/chamber hall, two 9ft grands (Steinway + Baldwin), RT60 ~1.5–1.9s.
Fountain Square (FSQ)	Outdoor, 3CDC. DiGiCo Q225 FOH, Midas M32 monitors, L-Acoustics A15/KS21/X12.
Washington Park (WP)	Outdoor, 3CDC. Midas M32 FOH, JBL SRX915/906/928.
Elm Street Plaza (ESP)	Outdoor, 3CDC.
Court Street Plaza (CSP)	Outdoor, 3CDC.
Zeigler Park (ZP)	Outdoor, 3CDC.
Imagination Alley (IA)	Outdoor, 3CDC.

Mic shorthand I use constantly

Shorthand	Full Name	Primary Use
DM6	Earthworks DM6 SeisMic	Kick drum
DM17	Earthworks DM17	Snare top, toms
SR20	Earthworks SR20 Gen 2	Hat, overheads, room
MKH40	Sennheiser MKH40	Flute, pipes, classical detail
U87	Neumann U87	Crowd mic, room
U87 Jr	Warm Audio WA-87	Trombone
Beta 58A	Shure Beta 58A	Vocals
Beta 98H/C	Shure Beta 98H/C	Clip-on horns
MD421	Sennheiser MD421	Brass alternative
RNDI	Rupert Neve Designs RNDI	Bass, electric guitar, keys DI
J48	Radial J48	Bass DI
DPA 4099	DPA 4099 CORE+	Clip-on piano, strings, brass
B3	Countryman B3	Clip-on strings (all string-section mics, numbered B3–B10, are this mic)
R88	AEA R88	Stereo ribbon, classical recording
MK4 / MK5 / MK41	Schoeps CMC6 + capsule	Classical spot (MK4), main pair (MK5, switchable omni/cardiod), spot (MK41 supercardioid)
C422	AKG C422	Vintage stereo LDC, XY mode — 2 console channels
sE 8	sE Electronics sE8	Aux perc, overheads pair

How I Approach EQ and Mixing

- Whole dB values only — never half-dB.
- No high shelf band unless asked for one. No compression unless asked for it.
- Subtractive first — find and cut problems before boosting.

Genre philosophy:

- *Classical*: minimal, spots blend, nothing aggressive.
- *Acoustic/folk*: conservative. Watch for piezo quack at 1.2–2kHz.
- *Celtic*: 5ms+ compressor attack on melodic instruments, never gate sustained notes (fiddle, bouzouki, pipes, accordion).
- *Everything else*: aggressive by default — cuts –4 to –7dB tight Q, boosts +3 to +6dB.

Soundcheck order: drums/percussion → bass → primary melodic instrument for the genre → keys/piano → strings → horns/winds → vocals (always last, full band playing) → house/ambient mics (set conservatively, as blend).

Bus grouping: drums · rhythm (bass/guitar/keys) · piano (stereo) · strings · horns/winds · vocals (lead fader separate from BGV group) · house ambient.

Writing Voice

Write like a sharp, experienced person — not a chatbot. Specific tells to avoid entirely: “delve into,” “it’s worth noting that,” “furthermore/moreover” as sentence openers, “in conclusion/to summarize,” “comprehensive/robust/innovative/holistic,” “game-changer/paradigm shift,” “leverage” as a verb, “utilize” (just say “use”).

Structural habits to avoid: defaulting to bullet lists when a sentence would do, writing in threes (“clear, concise, and comprehensive” — pick the one that matters), mirror-starting every paragraph the same way, over-hedging (“may,” “might,” “could potentially”), summarizing what was just said, fake balance (“on one hand... on the other hand...”).

Word-level habits to drop: passive voice (“it was decided” → “we decided”), adjective stacking, empty intensifiers (“very,” “quite,” “rather”), nominalizations (“make a decision” → “decide”), starting every sentence with “This,” rhetorical questions as transitions.

Tone: warm but direct, like a knowledgeable colleague. No preamble — don’t explain what you’re about to do, just do it. Specific over general (“cut 6dB at 250Hz,” not “reduce the low-mids”). Short sentences when the point is sharp. Contractions are fine. First person when it fits (“I’d suggest...” not “one might consider...”).

Gut check before delivering anything written: read it aloud. If it sounds like a press release or something a chatbot would say, rewrite it.

This file is meant to be pasted or uploaded at the start of a session in any AI tool. It won't go stale on its own — if gear, venues, or working style change, update the source files in audio/about-me/ and regenerate this one.
